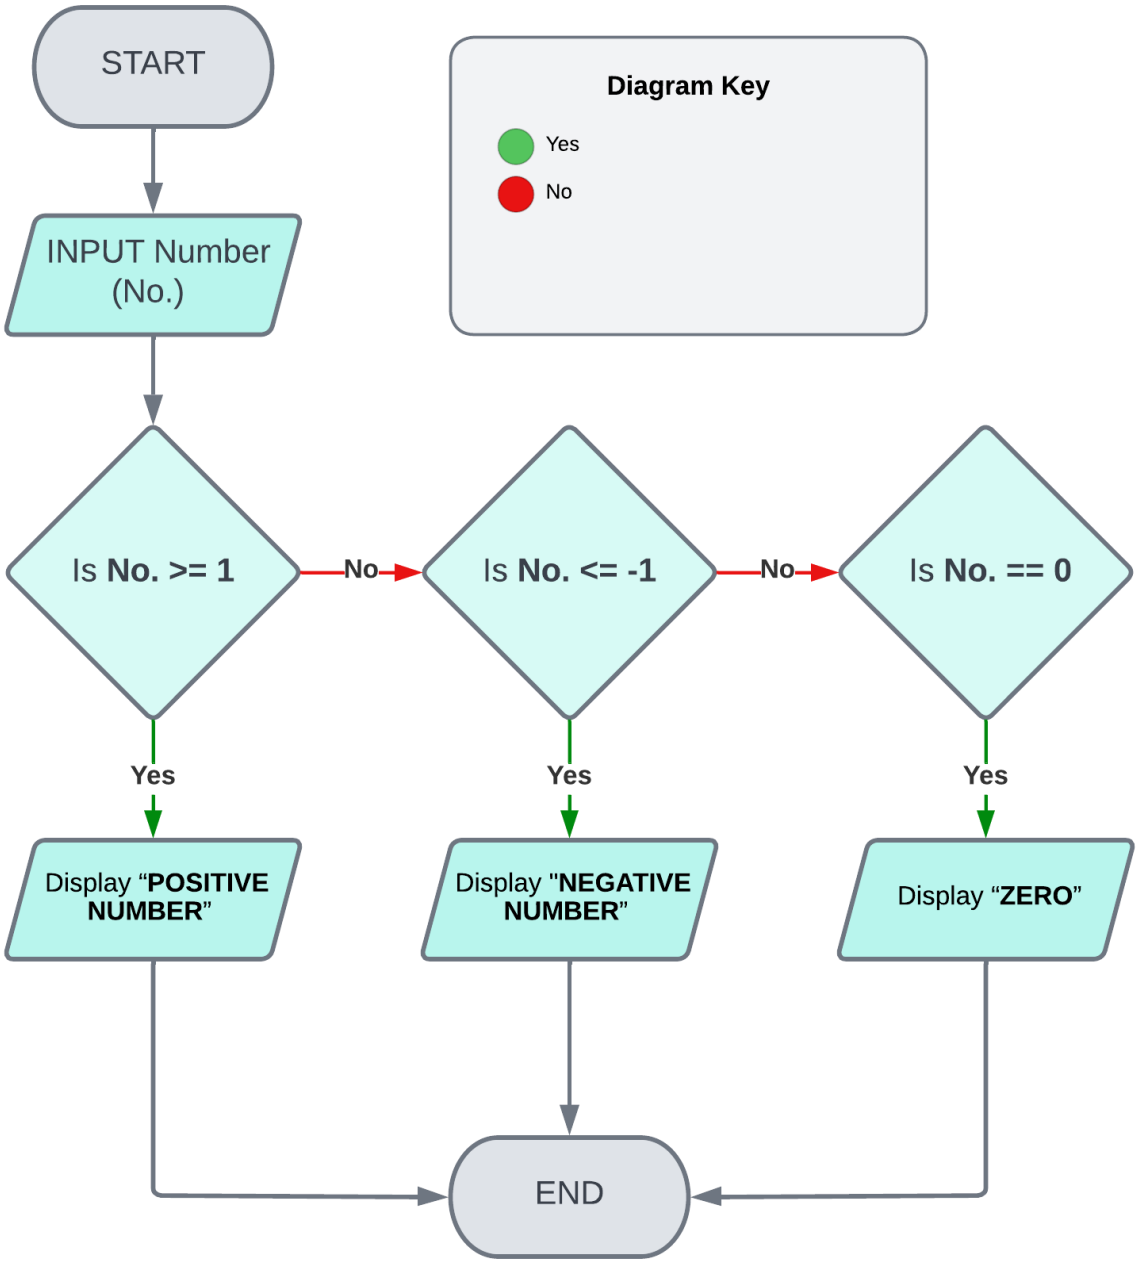
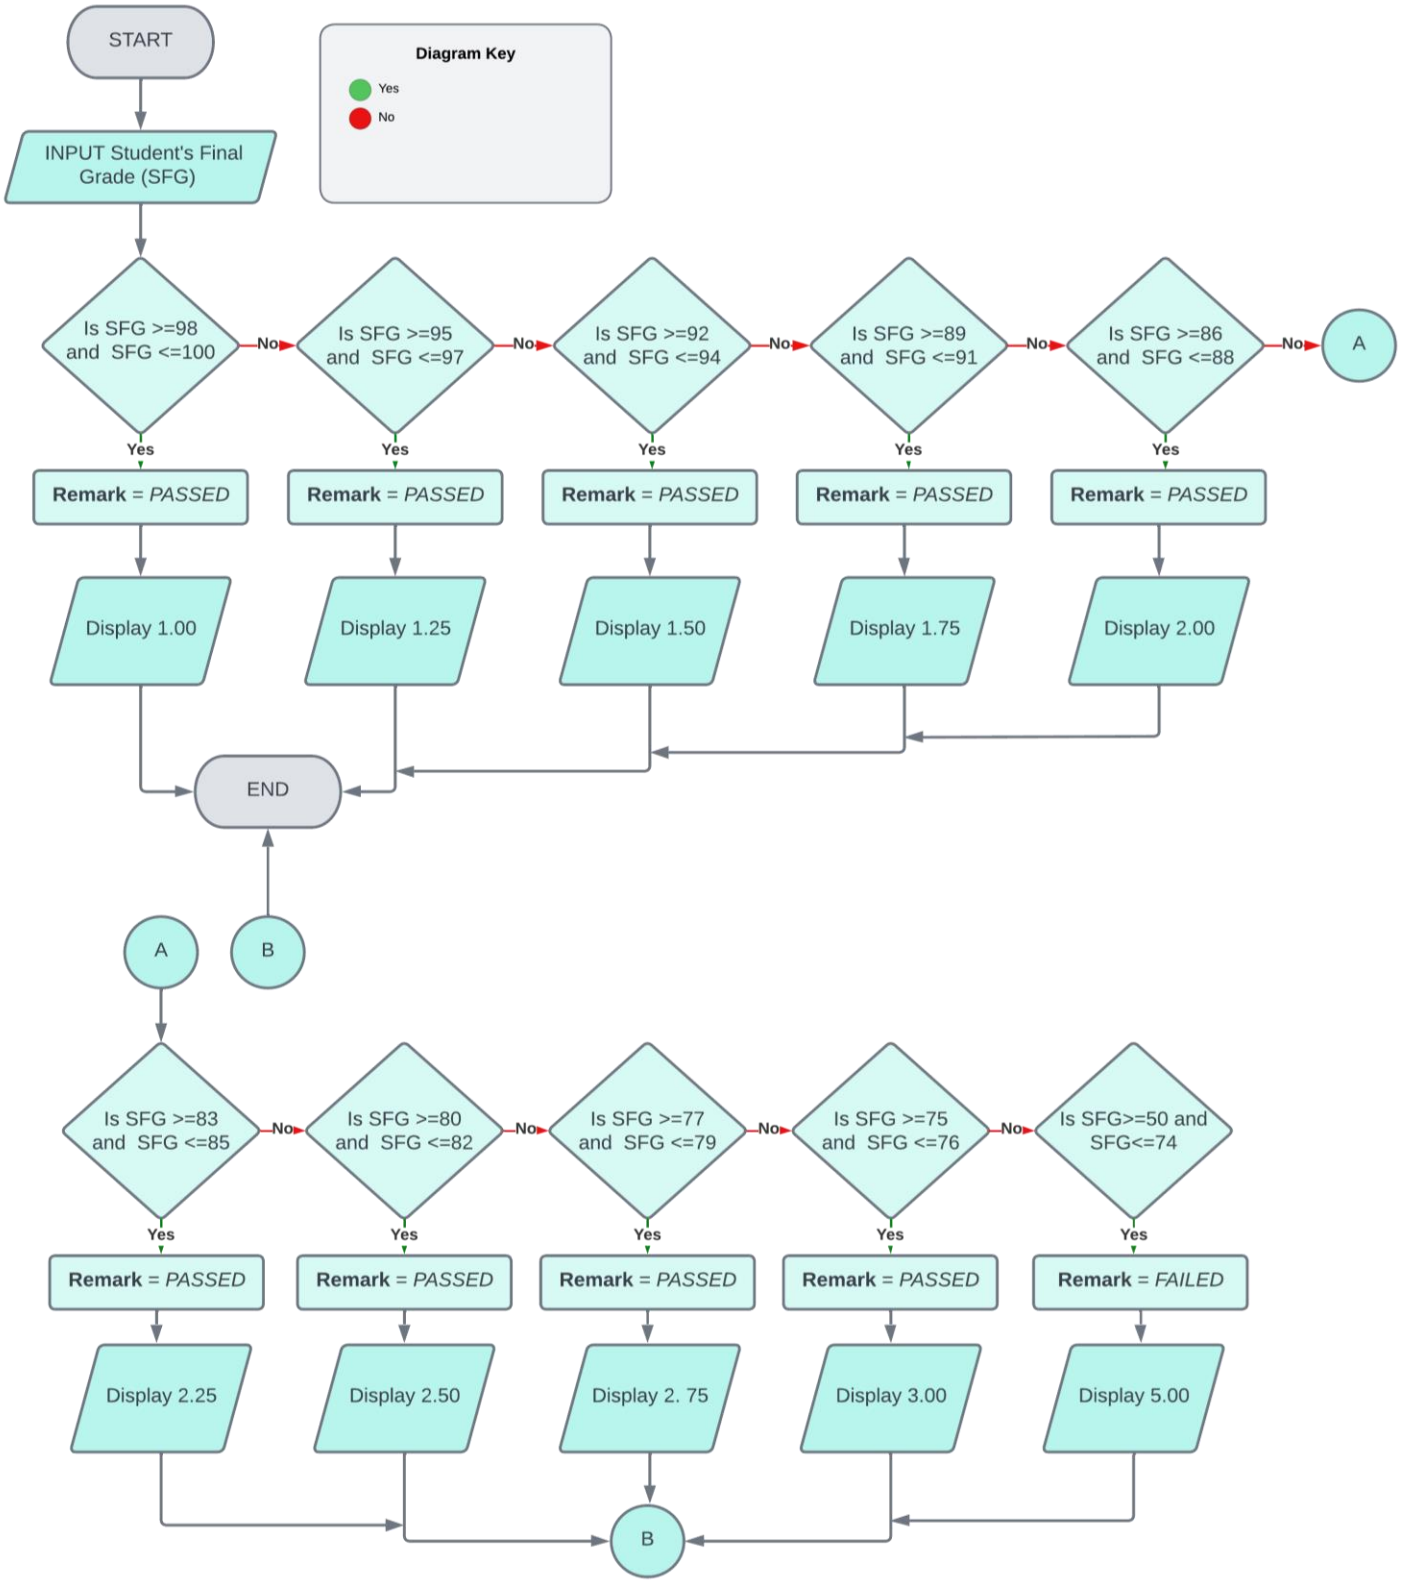
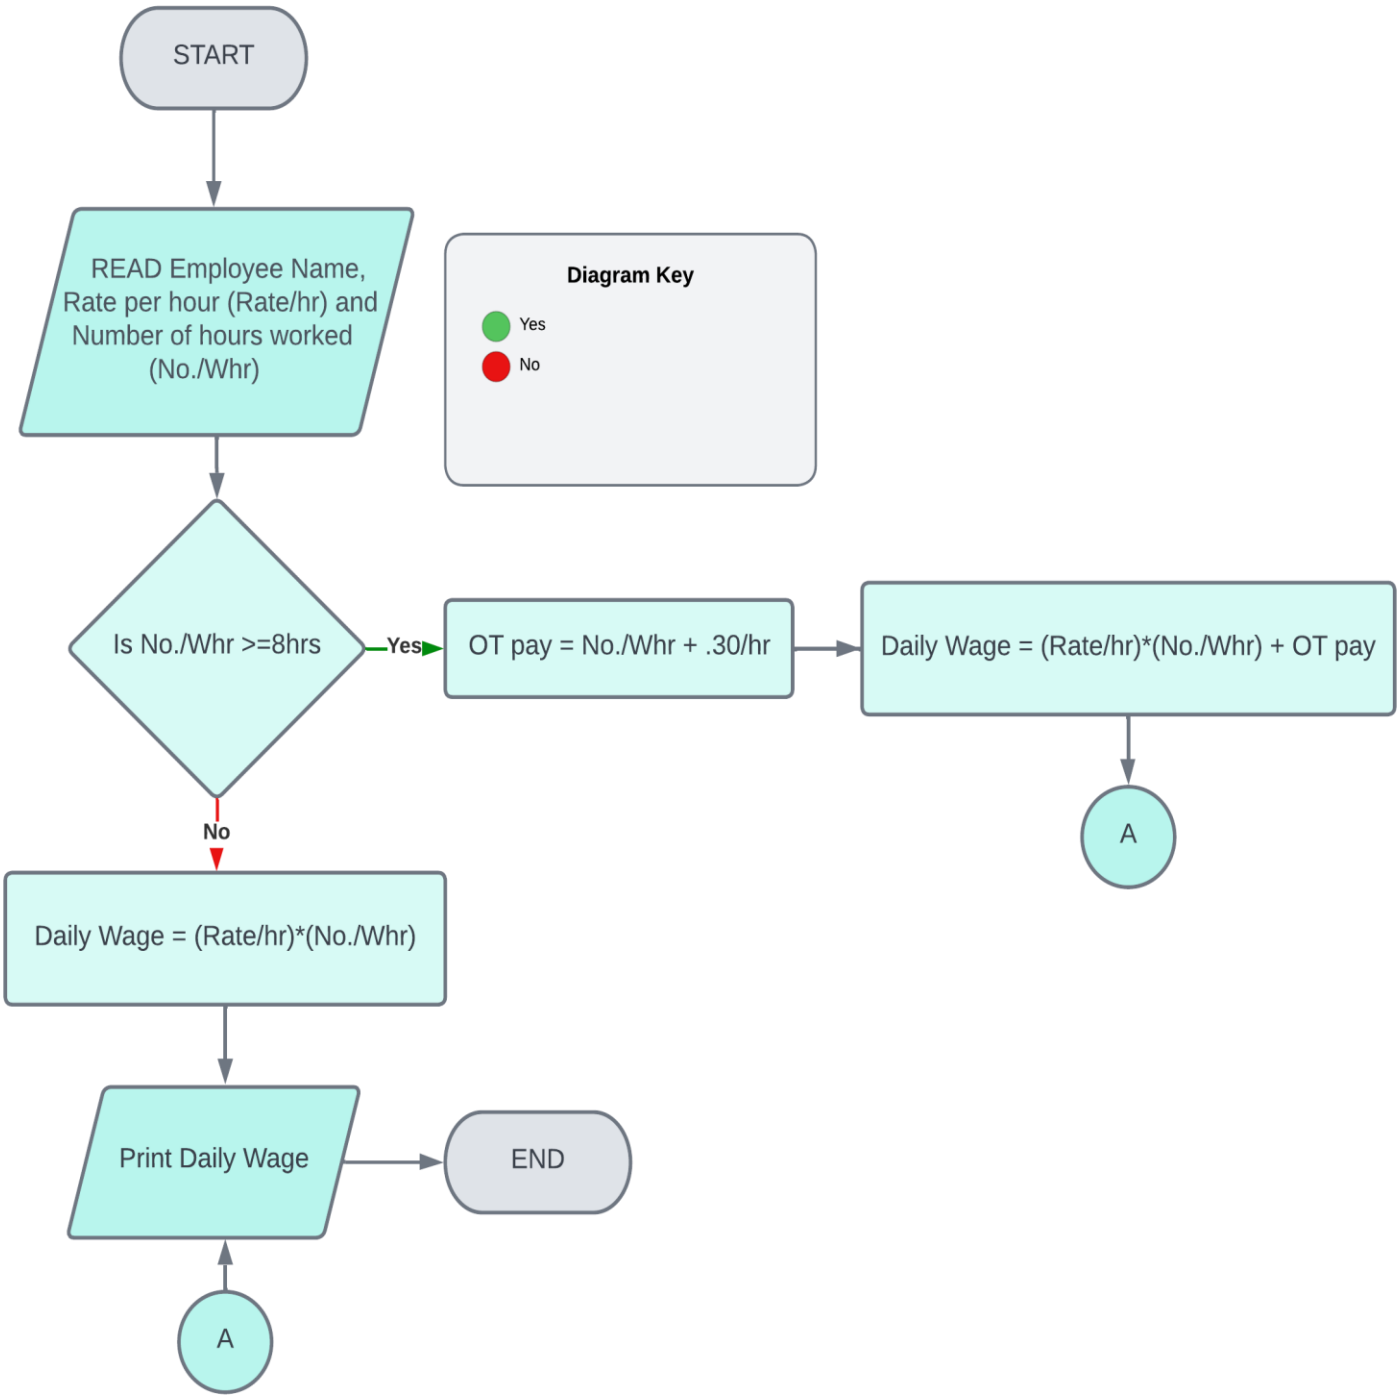
Show your answer in succeeding pages. Save as pdf then upload in canvas.

1. Write a flowchart that will input a number and evaluate if the number is “Positive”, “Negative” or “Zero”. If the number is positive display the message “POSITIVE NUMBER”, if negative “NEGATIVE NUMBER, and if zero display the message “ZERO”.



2. Write a flowchart that will input a student's final grade from 50-100. Evaluate the Final grade and display the Point Equivalent based on the table below. Indicate also the remarks if it is "Passed" or "Failed".



3. Write a flowchart that will input Employee Name, Rate per hour and Number of hours worked and will compute the daily wage of an employee. If the number of hours worked exceeds eight hours add 30% to each excess hours as overtime rate.


Formula: Daily Wage = Rate per hour * No. of hours worked + OT pay
