ABOUT ME

Dedicated and motivated Computer Engineering graduate with a solid foundation in programming, electronics, and system design. Skilled in developing software and embedded solutions using Python, Java, C++, and Arduino, with hands-on experience in AI integration, database management, and automation projects. Committed to continuous growth and lifelong learning, with a strong passion for innovation, robotics, and technology-driven problem-solving.

EDUCATION

- JOSÉ RIZAL UNIVERSITY** *SHAW BOULEVARD, MANDALUYONG CITY, PHILIPPINES*
Bachelor of Science in Computer Engineering *2022 - 2026*
Honors: Cum Laude
- JUAN R. LIWAG MEMORIAL HIGH SCHOOL** *BAYANIHAN, GAPAN CITY, PHILIPPINES*
Science, Technology, Engineering and Mathematics (STEM) Graduate *2020 - 2022*
- JUAN R. LIWAG MEMORIAL HIGH SCHOOL** *BAYANIHAN, GAPAN CITY, PHILIPPINES*
High School Diploma *2016 - 2020*

SKILLS AND INTEREST

Technical Skills: Python, Java, C++, HTML, CSS, Arduino, Android Studio, Circuit and Logic Design, System Troubleshooting, Database Management (MySQL, Oracle, Firebase, SQL Server)

Soft Skills: Leadership, Effective Communication, Analytical Problem-Solving, Adaptability in Dynamic Environments, Collaborative Teamwork, and Creative Innovation.

Certification: CompTIA ITF+, AWS Academy Graduate – Cloud Foundations, AWS Certified Cloud Practitioner

ACADEMIC PROJECTS

CHOLESCAN

May 2026

- Developed CholeScan, a non-invasive cholesterol estimation system using hand imaging and artificial neural networks to classify levels as Normal or High in real time.
- Enabled practical healthcare use by capturing standardized hand images, extracting features, and displaying results through a mobile application for clinics and rural health units.

WASTE SEGREGATION AND COMPOSTING SYSTEM

May 2025

- Developed an AI-powered waste segregation system using ESP32-CAM and CNN to classify waste (plastic, metal, paper, organic) and automatically sort it using servo-controlled bins.
- Utilized machine learning to recognize waste types without traditional sensors, enhancing cost efficiency.

LOST AND FOUND SYSTEM

May 2024

- Developed a web-based lost and found system using Python, HTML, and CSS to report, track, and recover lost items through structured forms and automated listings.
- Enhanced accessibility and accountability by digitizing the process, demonstrating strong problem-solving and backend/database management skills.

TICKET SELLING SYSTEM

May 2024

- Developed an online concert ticket selling system using HTML, CSS, JavaScript, PHP, and MySQL with user and admin dashboards for secure booking and management.
- Integrated cart, payment simulation, and event management features to ensure smooth transactions, real-time updates, and reliable data handling.

APPLICANT DEPLOYMENT SYSTEM

December 2023

- Developed a recruitment management system using Java Swing to automate applicant registration, screening, and deployment with a centralized database.

EXPERIENCE

RAKSO CT - ROBOTICS, PROGRAMMING AND AI DEPARTMENT

March 2026

Trainee / Intern

- Assisted in software development, testing, and system functionality improvements.
- Created and supported educational and interactive learning materials.
- Collaborated with teams to enhance system performance and user experience.
- Conducted research, data gathering, and evaluation for project support.
- Participated in presentations, demos, and project planning activities.
- Documented workflows, results, and recommended system improvements.
- Supported technical operations including ID printing, sorting, and RFID integration.
- Assisted in studio setup and image capture for ID processing and documentation.

AWS ACADEMY GRADUATE – CLOUD FOUNDATIONS

November 2025

Trainee / Student

- Completed foundational cloud training covering AWS core services, cloud concepts, and global cloud infrastructure.
- Gained hands-on experience using the AWS Management Console through guided labs focused on security, IAM, and basic cloud architecture.

SAFETY AWARENESS 101: UNLOCKING GREATNESS TOGETHER

October 2025

Event Organizer

- Organized and hosted a school webinar promoting Occupational Safety and Health (OSH) awareness for CpE Students.
- Collaborated with ATSOCA Learning Hub and Guest Speaker to ensure smooth event logistic and program flow.
- Designed promotional materials and facilitated participant engagement through interactive activities and raffles.
- Distributed e-certificates to attendees to recognize participation and commitment to workplace safety.
